

SCA to digitize records of all matches, players' statistics

SCA to digitize records of all matches, players' statistics

Vijaysinh Parmar, TNN | Nov 8, 2016, 04.00AM IST

Rajkot: Information regarding players and first-classes matches of Saurashtra Cricket Association (SCA) will be just a click away now.

SCA has taken up the mammoth task to collect all data related to past first-class matches of its players and making it online and accessible to all through its official website.

"We have already gathered details about players and first-class matches of the last 10 years from various sources. This compilation would be a ready reckoner for anyone wanting to know about any particular player or match," said Hemali Desai, the scorer of SCA and who is involved in the project.

The records include details like toss, score, runs, umpire, referee and winners among others. SCA is also making digital records of players' profile who played for the SCA team.

"We are compiling data of various championships including Ranji Trophy, Duleep Trophy, Irani trophy among others in its various formats like ODI matches, multi-day matches T20 and now Test matches," said an SCA official.

"The idea is to have all information on digital platform and accessible to all. We are trying to gather as many records of matches and players as possible" said Niranjana Shah, Honorary Secretary, SCA.

"Many times, former cricketers who played for SCA team, don't know their own records and stats. This initiative will help cricketers and those who are interested in gentlemen's game history" Desai added.
